PROFESSIONAL SUMMARY

Computer Science undergraduate with experience in full-stack web development and database management. Proficient in developing scalable web applications using the MERN Stack, Django, Python, Java, & SQL. Skilled in designing responsive user interfaces, optimizing backend performance, and implementing secure authentication systems. Strong problem-solving abilities with a passion for building efficient, user-centric software solutions.

PROJECTS

- **BMS – Booking Management System, (Python, Django, HTML, CSS, JavaScript & Sqlite)**

Created a movie ticket booking platform similar to BookMyShow, featuring user authentication, movie browsing, show scheduling, real-time seat availability tracking, interactive seat selection, ticket booking, and payment processing(stripe). Expanded an admin panel for managing movies, theaters, show timings, and bookings, ensuring a seamless and user-friendly ticket reservation experience.

- **Diamond E-Commerce Platform, MERN Stack (MongoDB, Express.js, React.js, & Node.js)**

Built a full-stack e-commerce application for buying and selling diamond products, incorporating secure JWT-based authentication, product catalog management, advanced search and filtering, shopping cart functionality, order processing, and inventory management. Designed responsive user interfaces and integrated database-driven operations to provide a scalable and seamless shopping experience.

- **MIPS – Medicine Intelligence Platform, (MERN Stack, Analytics)**

Architected an intelligent healthcare inventory management platform enabling real-time medicine stock tracking, automated expiry date monitoring, low-stock alerts, supplier management, and comprehensive inventory reporting. Integrated predictive analytics to forecast medicine demand, optimize stock levels, reduce wastage, and support data-driven decision-making through interactive dashboards and insights.
